Pricing

Priced by the square inch

At OSH Stencils we have a simple price model, only pay for what you need. We use a linear pricing model that starts at \$0.60 per sq inch and goes down as low as \$0.30 per sq inch. These prices are based on your total order size. If you order multiple stencils at once, your dimensions are combined for a total discounted price.

Ex1: You have one stencil that is 9sq inches. $9 \times \$0.60 = \5.40

Ex2: You have 2 stencils, and together they total 21 sqin. $21 \times \$0.55 = \11.55

Ex3: You have 3 stencils, and together they total 71 sqin. $71 \times \$0.30 = \21.30

- 1-12 sq inches - \$0.60 (60 cents USD) per sq inch.
- Each additional 2sq inches reduces the price by \$0.01, with a cap at \$0.30
- 14 sq inches - \$0.59 (59 cents USD) per sq inch.
- 16 sq inches - \$0.58 (58 cents USD) per sq inch.
- 18 sq inches - \$0.57 (57 cents USD) per sq inch.
- ...
- 71+ sq inches - \$0.30 (30 cents USD) per sq inch.

Costs are based on your total order size for all stencils in a single transaction. Sizes are measured in square inches for the material used (**including borders**). A single stencil can go up to a maximum single sheet size of 11"x20".

Engraving

There is no additional charge for custom engraving on your stencil border.

Jigs (Board Holder)

We offer 1/16" (1.6mm) stencil jigs in Black and White at checkout for \$5. An example of one is below.

NOTE: The USPS raised their rates on Jan 26th 2014, our rates have been updated to match the new rates.

Shipping

Domestic:

- USPS First Class no Tracking - \$0.70
- USPS First Class with Tracking - \$1.95
- USPS Priority Mail - \$5.00
- USPS Express Mail - \$20.00

International:

- Standard First Class Mail - \$3.25
- USPS Priority Mail - \$25.00
- USPS Express Mail - \$50.00

We are a proto PCB solder paste stencil maker that was originally inspired by OSH Park, the community-driven printed circuit board (PCB) service. Cheap PCB stencils. Cheap on price but never on quality. Low cost circuit board solder stencils. The Proto PCB Stencil Maker home of the Kapton Polyimide laser cut solder paste stencils for prototype and small batch pcb runs. The source for cheap pcb solder stencils.

Serving the maker community since 2013, focusing on SMT and SMD based stencils for solder paste electronic circuits and electronic design applications.
